Terms of Employment: Permanent, Full-Time (30-40 hrs /week)

Wage: \$32.40 to \$36 per hour.

Wage will be determined based on experience, skills, and qualifications, in accordance with company compensation practices and applicable program requirements.

Benefits: Dental Insurance, Disability Insurance, Extended Medical Insurance

Language at work: English

Work Location: Victoria, BC.

Company Description:

Wescor Contracting Ltd. works on commercial, industrial, tenant improvement, and custom residential projects involving wall and ceiling systems and related construction activities. The company specializes in delivering high-quality workmanship across a range of construction environments, with a focus on safety, efficiency, and meeting project specifications.

Wescor Contracting Ltd. is seeking dependable and skilled individuals for the position of Lather (Interior Systems Mechanic) to perform installation of interior wall and ceiling systems on commercial, industrial, tenant improvement, and custom residential projects. Candidates with varying levels of relevant experience, training, and qualifications may be considered, including those who have completed or are progressing through a recognized apprenticeship program. Successful candidates will be responsible for performing a variety of interior systems installation tasks. Depending on their experience and qualifications, employees may work independently or as part of a construction crew under the direction of experienced supervisors, while maintaining high standards of workmanship, safety, and efficiency.

Job Description

The key responsibilities of Lathers (Interior Systems Mechanics) at Wescor Contracting Ltd. are outlined below.

- Assist with site setup, material staging, surface preparation, and worksite cleanup.
- Read and interpret blueprints, drawings, and specifications to prepare wall and ceiling layouts.
- Assemble and install suspended metal ceiling grids and ceiling panels.
- Measure, mark, and cut framing materials, drywall sheets, and related products for installation.
- Position and secure drywall sheets to metal or wooden studs or joists, and perform or assist with taping joints and seams.
- Apply and smooth plaster coats on interior surfaces.
- Install or assist with the installation of steel stud framing, furring channels, metal or gypsum lath, shaft wall systems, drywall, and suspended ceilings, including work on concrete substrates, according to drawings and specifications.
- Cut openings in lath, drywall, and related wall and ceiling materials for vents, ducts, piping, and electrical outlets.
- Install corner beads, trims, and other wall and ceiling system components.
- Load, unload, move, sort, and store materials, tools, and equipment safely.
- Follow workplace safety procedures, wear personal protective equipment, and maintain a clean and organized jobsite.
- Work cooperatively with supervisors, journeypersons, apprentices, and other trades to complete assigned tasks.
- Measure, cut, and install wood framing, backing, and supporting components as required for interior wall partitions, drywall, and ceiling installations.

Position Requirements:

- Completion of secondary school.

One of the following qualifications is required:

- Completion of a 3–4 year apprenticeship program in drywalling, lathing, or a related trade, or
- A combination of over three years of directly related hands-on experience along with relevant high school, college, or industry-level training in drywalling, lathing, or a related field.
- Additional trade-related training or enrollment in an apprenticeship program is an asset.

Work Conditions and Physical Capabilities

- Physically demanding construction environment
- Standing, walking, bending, crouching, and kneeling for extended periods
- Lifting, carrying, and moving materials, tools, and equipment
- Working at heights, on ladders, scaffolds, and elevated work platforms
- Fast-paced work environment
- Repetitive tasks
- Heavy weight handling

Personal Suitability

- Dependability
- Reliability
- Team player
- Punctuality
- Willingness to learn
- Safety-focused attitude
- Manual dexterity
- Attention to detail
- Basic measuring, layout, and math skills
- Ability to follow instructions and work effectively as part of a crew

Employment Terms

- Apprentice level may be determined based on skills, experience, and training.
- Wage placement within the posted range will be determined based on directly related experience, skill level, and qualifications.
